Vaal University of Technology (Executive Director/CIO) [2003-Present]

Accountable for Vaal University of Technology's (i.e. VUT) ICT infrastructure management, business support, demand management, and technology investment portfolio. A member of Executive Management Committee responsible for the institution's governance. A member of institution budget committee, tender adjudication committee, audit & risk committee. A member of WITS ICT council and University of Mpumalanga ICT, Audit and Risk committee.

ABSA [2003]

Worked as a **Solutions Architecture** responsible for corporate portal infrastructure, content management, and identity management. Worked on the proof of concept for ABSA portal. I left for a CIO position at the Vaal University of Technology.

Uthingo Management (National Lottery Operator) [1999-2003]

Lead a team of five as a **Solutions Support Specialist**, responsible for Lottery's backend applications. Developed a number of applications with Lotus Notes and J2EE solutions. Left for ABSA to improve my J2EE experience.

3M South Africa [1998-1999]

Appointed as an **Infrastructure Manager** responsible for the rollout of internet and collaboration tools. Responsible for training on office productivity tools. Served as Africa's representative on EMEA infrastructure advisory forum. Left for a better opportunity at Uthingo.

IBM South Africa [1994-1998]

Started my professional ICT career at IBM working on mainframes, AS/400, Tivoli, Lotus Notes and OS/2. As an **Advisory System Engineer**, I was responsible for training interns on various technologies. Later moved for infrastructure management and optimization at 3M South Africa.
